-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 10/4/2004 & 8/22/2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.

Art Unit: 1762

1. This application contains claims directed to the following four sets of patentably distinct

species: A.) RF biasing techniques:

- i) pulse modulation bias techniques;
- ii) single burst bias;

and B.) Workpiece or substrate or type of layer treated:

- i) dielectric;
- ii) semiconductor;

and C.) Pre-treatments:

- i) passivation of workpiece;
- ii) "pre-cleaning" of workpiece;
- iii) plasma cleaning chamber;

and D.) Post-treatments:

- i) thermal annealing;
- ii) stripping photoresist or mask;
- iii) wet-cleaning.

The species are independent or distinct because species group A represents two different mutually exclusive means of applying bias; species group B represents two different generic types of substrates/layers being treated with different properties; species group C represents three totally different types of pretreatment processes that may be done before the ion implantation process; & species group D represents three different types of posttreatment processes to be performed after the ion implanting process.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of the four sets of species groups, i.e. one from each of A, B, C & D, for prosecution on the merits to which the

Art Unit: 1762

claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1-2, 5, 44, 51-52, 55-59, 73-74 & 83 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. A telephone call was made to Robert Wallace on 10/(16-17)/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1762

Mr. Wallace requested that the species requirement be mailed.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marianne L. Padgett whose telephone number is (571) 272-1425. The examiner can normally be reached on M-F from about 8:30 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks, can be reached at (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
